

TABLE OF CONTENTS

SECTION 1: INTRODUCTION

1.1. Purpose.....	1
1.2. Need For Stormwater Management	1
1.2.1 Effects of Urbanization on Watershed Hydrology.....	1
1.2.2 Stormwater Management Regulations and Policies	7

SECTION 2: STORMWATER MANAGEMENT REQUIREMENTS

2.1 City of Greensboro Stormwater Master Plans	11
2.2 Stormwater Management Plan.....	11
2.2.1 Stormwater Management/Watershed Development Plan Components	11
2.3 Stream Protection Requirements.....	16
2.3.1 Stream Channelization/Piping Restrictions	16
2.3.2 Stream Buffers	16
2.4 Stormwater Quality and Quantity Control.....	18
2.4.1 Quality Control for High Density Development in Water Supply Watershed Areas.....	18
2.4.2 Quantity Control	18
2.4.3 Hydraulic/Hydrologic Methods	22
2.4.4 Engineer's Certification Note of Stormwater Quantity Control	24
2.5 Modifications to Stormwater Requirements	25
2.5.1 Water Supply Watershed Protection.....	25
2.5.2 Stormwater Management Control.....	25

SECTION 3: STORMWATER BEST MANAGEMENT PRACTICES

3.1 Overview of Stormwater BMPs.....	27
3.1.1 Pollution Prevention BMPs.....	27
3.1.2 Stormwater Quality/Quantity BMPs.....	28
3.2 Pollution Prevention BMPs.....	29
3.2.1 Employee Education	29
3.2.2 On-Site Refuse Management	32
3.2.3 Stormwater System Maintenance	33
3.2.4 Paved Area Sweeping	35
3.2.5 Used Oil Recycling	36
3.2.6 Covering.....	37
3.2.7 Spill Containment	37
3.2.8 Soil Erosion Control	39

3.3 Non-Structural BMPs.....	40
3.3.1 Open Vegetated Conveyance.....	40
3.3.2 Stream Buffers	42
3.3.3 Disconnect Rooftop Drainage.....	43
3.3.4 Clustering/Conservation of Natural Areas.....	44
3.3.5 Grass Paving	45
3.3.6 Natural Infiltration	46
3.4 Structural BMPs.....	49
3.4.1 Introduction.....	49
3.4.2 Structural BMP Selection Guidelines	50
3.4.3 Control Volumes.....	52
3.4.4 Stormwater Utility Credit	53
3.4.5 Regulatory Considerations.....	53
3.4.6 Grass Swales	56
3.4.7 Filter Strips.....	58
3.4.8 Dry Detention Basins.....	60
3.4.9 Wet Detention Ponds	63
3.4.10 Stormwater Wetlands.....	70
3.4.11 Bioretention Areas	77
3.4.12 Sand Filtration Facilities	84
3.4.13 Proprietary Stormwater Treatment Facilities.....	91
3.5 Structural BMP Installation Guidelines	94
3.5.1 Introduction.....	94
3.5.2 Grass Swales, Filter Strips	94
3.5.3 Dry Detention Basins and Wet Detention Ponds	95
3.5.4 Stormwater Wetlands.....	96
3.5.5 Bioretention Areas	97
3.5.6 Sand Filtration Facilities	98
3.5.7 Proprietary Stormwater Treatment Facilities.....	98
3.6 Structural BMP Maintenance and Inspection Guidelines	99
3.6.1 Introduction.....	99
3.6.2 BMP Maintenance Requirements	99
3.6.3 General Maintenance Guidelines	100
3.6.4 Grass Swales, Filter Strips	102
3.6.5 Dry Detention Basins, Wet Detention Ponds, Stormwater Wetlands.....	103
3.6.6 Bioretention Areas	106
3.6.7 Sand Filtration Facilities	109
3.6.8 Proprietary Stormwater Treatment Facilities.....	111
GLOSSARY	112
REFERENCES AND RESOURCES.....	126

APPENDIX A: Amended Chapter 30 Ordinance – Randleman Lake Watershed Protection Requirements (effective January 1, 2000)
Map of the Greensboro Water-Supply Watershed
Map of the Greensboro Water-Supply Watershed Critical Area

APPENDIX B: Amended Section 27 (effective April 2000)

APPENDIX C: Precipitation Distribution Table
Depth-Duration-Frequency Table, Intensity-Duration-Frequency

APPENDIX D: Example of Pond Detention Computations

APPENDIX E: Dr. H.R. Malcom's Preliminary Basin Design

APPENDIX F: Dam Safety NC Administrative Code Title 15A Subchapter 2K,
(Amended 1995)

APPENDIX G: Example Wetland Plantings

APPENDIX H: Example Trash Protection for Low Flow Orifices

APPENDIX I: Example Calculation Method for Orifice Drawdown Time

APPENDIX J: Description of Filter and Drainage Diaphragm for Seepage Control
(Source: NRCS)

APPENDIX K: Sample BMP Inspection and Maintenance Checklists

APPENDIX L: Preliminary Estimates of Capital Costs of Stormwater Ponds for Quantity and Combined Quantity and Quality Control

LIST OF TABLES

Table 1.1 Examples of Pollution in Urban Runoff	6
Table 1.2 Pollutant Event Mean Concentrations for Different Land Uses in Greensboro	6
Table 2.1 Stream Buffer Requirements	17
Table 2.2 Randleman Lake Watershed Stream Buffer Requirements	17
Table 3.1 Summary of Employee Education Requirements	30
Table 3.2 Suitable Soil Types for Natural Infiltration	47
Table 3.3 Structural BMP Control Efficiency Rating.....	49
Table 3.4 BMP Site Suitability	50
Table 3.5 Community Acceptance.....	51
Table 3.6 Suggested BMP for Various Land Uses	52
Table 3.7 Dam Hazard Classification	54
Table 3.8 Wet Detention Pond Permanent Pool Surface Area to Drainage Area Ratio.....	67
Table 3.9 Wetland Permanent Pool Surface Area to Drainage Area Ratio	73
Table 3.10 Examples of Plant Species Suitable for Bioretention	82

LIST OF FIGURES

Figure 1.1 Relationship Between Impervious Cover and Stream Quality	2
Figure 1.2 Changes in Water Balance due to Urbanization.....	3
Figure 1.3 Changes in Hydrology due to Urbanization	4
Figure 1.4 Changes in Floodplain due to Urbanization	5
Figure 3.1 Example Spill Containment Structure for Floatable Material	39
Figure 3.2 Engineer's Certification of Pond and Dam Safety	54
Figure 3.3 Example of Grass Swale.....	57
Figure 3.4 Example of Filter Strip	59
Figure 3.5 Example of Dry Detention Basin	62
Figure 3.6 Example of Wet Detention Pond	65
